

I-KEY 16

KVM add-ons, Article number A3200002

The I-Key is a programmable input device with 16 keys for PS/2-based systems.

DETAILS

DEVICE

- Similar to a keyboard, the learned commands are forwarded to a computer or KVM switch behind it.
- Each of the keys can have two functions (layer technology), so that up to 30 individual macros can be saved (one key is not required to switch between the layers).

WARRANTY

- A 3-year, free of charge product guarantee
